THE EVIL OF THE DALEKS

PART 6

The Doctor and Jamie travel to Skaro where the Doctor is confronted by the Emperor Dalek.

Season 4 Episode 42

First Broadcast: 24 June 1967

The Dalek circles around the room, carrying the Doctor. "Jamie, they're taking me for a ride!" the Doctor exclaims, delightedly. "It's a game, Jamie, they're playing a game!" The Doctor begins to laugh. Jamie watches, uncertainly as the other Daleks join in. "They're playing trains!" the Doctor says. The Doctor is amazed by the Daleks' playfulness. Maxtible congratulates him before leaving.

The Doctor explains that the Daleks are still children, but will mature within a matter of hours. He introduces Jamie to them, telling the Daleks that he is their friend. As he speaks, he draws a small Greek symbol on each Daleks' casing – Alpha, Beta and Omega – and tells them that these are now their names.

The three humanised Daleks turn to the Time Cabinet. "We must go now," Alpha says. Beta and Omega glide inside. "All Daleks are ordered to return to Skaro," Alpha says, and joins them. The Doctor is alarmed by this. "Where's Victoria?" Jamie asks. They head for the secret passage where they left her.

Waterfield also wants to know Victoria's whereabouts. Maxtible suggests that Waterfield search for her in the garden. Once he has gone, Maxtible notices a large device on the floor. A Dalek emerges from the Time Cabinet and orders him not to touch it. Maxtible knows that he is expected to bring the Doctor and Jamie to the Time Cabinet. "Then the secret!" Maxtible says. "You will give it to me... the transmutation formula?" His voice takes on a pleading tone. "Yes," the Dalek replies. "Obey your order." It departs.

Maxtible cannot move the device and calls out to the Doctor. Waterfield returns, angry. He has been listening

to Maxtible and the Dalek. "You've sold yourself to them, haven't you?" he says. Maxtible tells him that the Daleks have offered him the secret of transmuting metal into gold. Waterfield is concerned only with his daughter's safety. Furious, he grabs Maxtible around the throat. Maxtible saves himself by knocking Waterfield unconscious.

The Dalek returns and studies the device on the floor. Maxtible asks what it is for. "We are destroying this area," it says. Maxtible is horrified by the thought of his

house being obliterated. "If you destroy my laboratory, the secret is useless!" he protests. The Dalek ignores him and returns to the Time Cabinet. The bomb is now flashing as it begins its countdown. There are only two minutes left. Maxtible yells for the Doctor, then grabs his hat and bag before running into the Time Cabinet.

Waterfield awakens in time to see the remaining Daleks go into the Time Cabinet. He overhears them saying that the prisoners "are already in transit". The Doctor and Jamie arrive and Waterfield warns them that the bomb is about to go off. "We'll have to follow the Daleks to Skaro!" the Doctor says. Jamie tries to open the Time Cabinet's doors, but they are locked. The Doctor activates the Daleks' time machine instead. Jamie wonders where Victoria is. The three men fade away just as the bomb detonates. Maxtible's house is wiped from the face of the Earth.

Victoria sits in a dark cell made of cold metal. Kemel stands nearby, gently mopping her brow with a handkerchief. The door slides open and Maxtible enters. He is surprised to find Victoria there and tells her they are on the Dalek planet, Skaro. The door opens again, and a Dalek orders Maxtible to follow it. Victoria realises that Maxtible will not help them. She sits down again and smiles at Kemel. "Don't worry, Kemel, I shall protect you," she says. Kemel returns her smile.

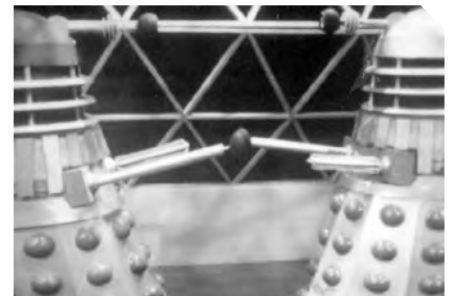

Waterfield stands on a rocky ledge overlooking the Dalek city. He, the Doctor, and Jamie walk towards a tunnel entrance. "How long have you known

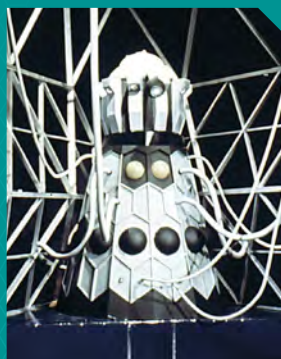

that's there?" Jamie asks. The Doctor urges them to be quiet as they enter. Maxtible is confronted by a Black Dalek. It is angered when it learns that Maxtible failed to bring the Doctor with him. Maxtible is furious that his house was blown up. "What right did you, or anyone, have to destroy it?!" he demands. The Black Dalek strikes Maxtible, who falls to the floor. "You have disobeyed a Dalek command!" it cries. Maxtible begs for mercy. An alarm sounds.

Two Daleks enter Victoria and Kemel's cell. Victoria hears a Dalek over the loudspeaker announcing that humans have been detected entering the city. "Oh, Kemel, there's a chance!" she cries.

Alpha is stopped in a corridor by a Black

TOP DALEK

The Dalek Emperor made its first appearance in *The Evil of the Daleks* in the final episode of the serial. Terry Nation had initially planned for a special Dalek ruler to appear at the end of the first Dalek serial; he imagined it having a transparent glass casing. However, the limited budget did not allow the prop to be built. The Dalek Emperor was designed by the production

team for the serial. The wooden prop was 15 feet tall, and its dome and lighting were operated by a performer inside it. The Emperor's booming voice was provided by Peter Hawkins. The recording was layered and processed to give it a powerful echoing effect.

ORIGINAL STORY

David Whitaker's initial two-page synopsis for *The Evil of the Daleks*, dated 4 January 1964, differed in many ways from the finished story. The TARDIS is stolen by Edward Waterfield because the Daleks have his daughter, Victoria, hostage. He uses his two-man time machine to take the Doctor and Jamie back to 1880. The Doctor learns of the Daleks' 'three-phase plan'. The Doctor and Waterfield travel back

Dalek which has noticed the mark placed on its casing by the Doctor. "That is my name," Alpha explains. "The Doctor gave it to me... he is my friend."

Victoria and Kemel are taken to another cell where Maxtible is being held. He asks her if she knows anything, but Victoria ignores him. A Dalek orders him to follow it. He walks into the darkness in fear. A moment passes, and Victoria hears Maxtible cry out in pain.

The Dalek returns and orders Victoria to follow it. Kemel moves to protect her but she stops him. She follows the Dalek.

The Doctor, Jamie, and Waterfield continue through the tunnels. There is a massive chasm on their left. They hear

Victoria screaming. Jamie tries to run towards the sound but is restrained by the Doctor. "You'll go over the ledge!" he says. Through the smoke comes what appears to be Omega. "Doctor. I am your friend," it says. "I have come to lead you." The Doctor thanks the Dalek. He stumbles and falls beside it, noticing the symbol on its skirt. Suddenly, the Doctor rises and shoves the Dalek over the ledge. It falls to the bottom of the chasm and explodes. Jamie is shocked. "You think I don't know my own mark?" the Doctor says. "That wasn't the real Omega at all!"

Victoria and Maxtible return to their cell. Victoria is furious with him. "You came up behind me in the dark and twisted my arm!" Maxtible insists that he had no choice – the Daleks were threatening his life. Victoria realises why the Daleks wanted her screams: "There are other people in the city. They wanted to draw them out – trap them!" Kemel comforts her as she sobs.

The Doctor, Jamie, and Waterfield enter the city. They are soon captured and led into a massive chamber. The Doctor stares up at a huge shape in the darkness. A sudden pool of light illuminates it: the Emperor Dalek. "Doctor!" it says in a booming voice, far louder than any Dalek the Doctor has ever heard before. "Look at the size of that thing!" Jamie whispers in awe. "We meet at last," the Doctor says to the Emperor. "I wondered if we ever would." The Doctor tells the Emperor that he has beaten it – the three Daleks with the Human Factor will spread their individuality across the Dalek race and ultimately destroy the Emperor.

The Emperor is unimpressed. "The Human Factor showed us what the Dalek Factor was," it says. "Without knowing it, you have shown the Daleks what their own strength is." Jamie asks the Doctor what the Dalek Factor is. "It means to obey, to fight, to destroy, to exterminate," the Doctor replies, worried. The Emperor tells the Doctor that he will serve the Daleks. "I won't do it!" the Doctor shouts. The TARDIS is revealed elsewhere in the chamber. "You will take the Dalek Factor," the Emperor declares. "You will spread it through the entire history of Earth!"

to 20,000 BC in the TARDIS, where they meet a primitive caveman called Og. They capture him and take him back to 1880. The Doctor is ordered to experiment on Og to find out what makes humanity function. Jamie is taken to Skaro, where he meets Victoria who is being held prisoner by the Daleks. The Daleks plan to destroy humanity's instinct in the past, but they are defeated. The story concludes back in Victorian London.

LEATHER LUNGS

bloody mikes off!' I let out this whopper, and even the restaurant next door heard the scream and cleared the place. I lost my voice for two days over that one, so you've got to control it. I let rip – I felt the vocal cords go ting, ting, ting and I thought, 'Hello, I've done it this time.'" In her final story, *Fury from the Deep*, Victoria's screams were used as a weapon against the monster.

Episode 6 of *The Evil of the Daleks* features one of Victoria's early notable screams – a trait that actor Deborah Watling would become famous for as her time on *Doctor Who* progressed. She nicknamed her character 'Leather Lungs'. In a 1994 interview, she commented: "When I go to conventions now there's always some Smart Alec in the audience saying, 'Can you give us a scream, please?' I have lost my voice so many times over that scream. In America I had 3,000 people in the audience, and they asked for the scream, so I asked them to turn the mikes off. They said, 'Don't be silly,' so I said, 'Turn the

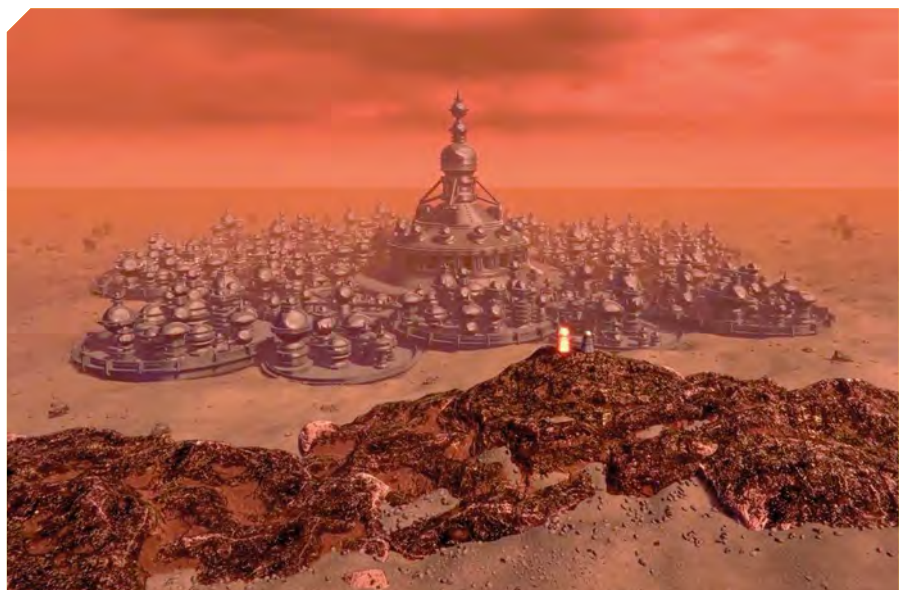

THE DALEK CITY ON SKARO

The Daleks are centred within a single city on their homeworld, Skaro. While they maintain various strategic bases positioned across the planet, many hidden beneath the desert surface or deep within jungles and mountains, these are relatively small outposts compared to their primary dwelling. The Dalek City is their sole true seat of power. It has no name – it is simply ‘the City’.

The original Dalek City was built upon the ruins of the Kaled dome, which had been destroyed in the final days of the war with the Thals. It fell, in part, due to the treachery of Davros, whose actions hastened the collapse of his own people. Much of the structure had been reduced to rubble by relentless Thal bombardment, but when the Daleks finally emerged from the Kaled bunker, they found that even the ruins could be repurposed into building materials. Mining valuable ore from the nearby mountain range, they began constructing a new home.

Over time, the Daleks became increasingly dependent on the city, to the point that they required constant contact with its floors for their mobility, powered by static electricity. The city became both their home and their prison. The Daleks reasoned that there was no need to venture beyond its boundaries,

as no important lifeforms remained on Skaro to exterminate. The return of the Thals changed this perspective forever. The city’s boundaries stretch much further outward than it would at first appear. Beneath its surface lies a highly developed system of tunnels that penetrate the mountain range.

The most vital areas of the city:

CENTRAL CONTROL ANTENNA

A tower at the centre of the city transmits power across its metal floors. This enables the Dalek population to move freely around the city powered by static electricity without relying on their internal power reserves.

COUNCIL CHAMBER

A large circular amphitheatre in which Daleks of higher ranking can gather and be addressed by the Emperor. It contains holographic displays for visual communication. Recording devices can broadcast messages to anywhere in the Dalek Empire.

IMPERIAL COMMAND

The private quarters of the Dalek Emperor. The Emperor is the only Dalek to have a separate living area. From here, it oversees all aspects of Dalek society here using a hyperlink to the Dalek Pathweb – the only one of its kind.

NUTRIENT TANKS

Plant life native to Skaro is cultivated under artificial sunlight within vast containment tanks, then processed by high-speed pulverisers. The resulting organic matter is refined into nutrient-rich gases, which are circulated throughout the city's ventilation system. The Daleks absorb these gases as sustenance.

SUICIDE ROOM

A chamber that is linked to every defence system on Skaro. Two Daleks are assigned to this station for one year, isolated from all other Daleks. If they judge that Skaro faces an invasion with no hope of victory, they are authorised to initiate a self-destruct protocol.

SAUCER CRAFT CONSTRUCTION FACTORY

All Dalek saucer craft are built here. Propulsion units, hulls, navigation arrays, and weapons are manufactured in specialised sectors across the city, in then transported to this central facility for final assembly. The complex also serves as the primary hub for the maintenance, servicing, and repair of all saucer craft.

WAR LABORATORY

A specialised facility where Scientist Daleks develop and test new weapons. Experimental technologies are subjected to controlled trials within this complex. Notable creations include the Magnetrap, Anti-Gravitator, Dreamwave, Thunderiser, Voltoscope, and Fertikiller.

REPRODUCTION HUB

All Dalek mutants are generated and developed here, drawn from the most viable genetic stock. Dalek Geneticists monitor each mutant stream and are

responsible for their conditioning and programming.

PRIME ARSENAL

The Daleks' mightiest weapons are stored inside a Dalekanium-lined vault. These include planet-dissolving implosion devices, neutronic missiles, plague bombs, sonic landmines, and gravitational destabilisers.

COMMAND NEXUS

A multi-level command and control centre used for military and strategic planning. All Dalek assaults on outer worlds are planned and monitored here. The Nexus also oversees all the city's operations and internal surveillance.

JUSTICE CENTRE

An underground detention facility for high-value prisoners. Enemies of the Dalek Empire deemed worthy of interrogation are confined here. The complex is equipped with numerous torture devices and psionic penetration probes.

STARPORT

The primary launch facility for all Dalek spacecraft. The main launchpad is covered in anti-gravity emitters to aid the craft during take-off. A sophisticated cosmic sensor array is positioned here, enabling the tracking of all incoming and outgoing craft.

POWER RELAY STATION

The city draws energy from multiple sources, including hydroelectric turbines, geothermal units, solar arrays, and cosmic radiation. This station regulates these inputs and stores the energy within massive transformers.

BASE SECTION

OUTER PANELING

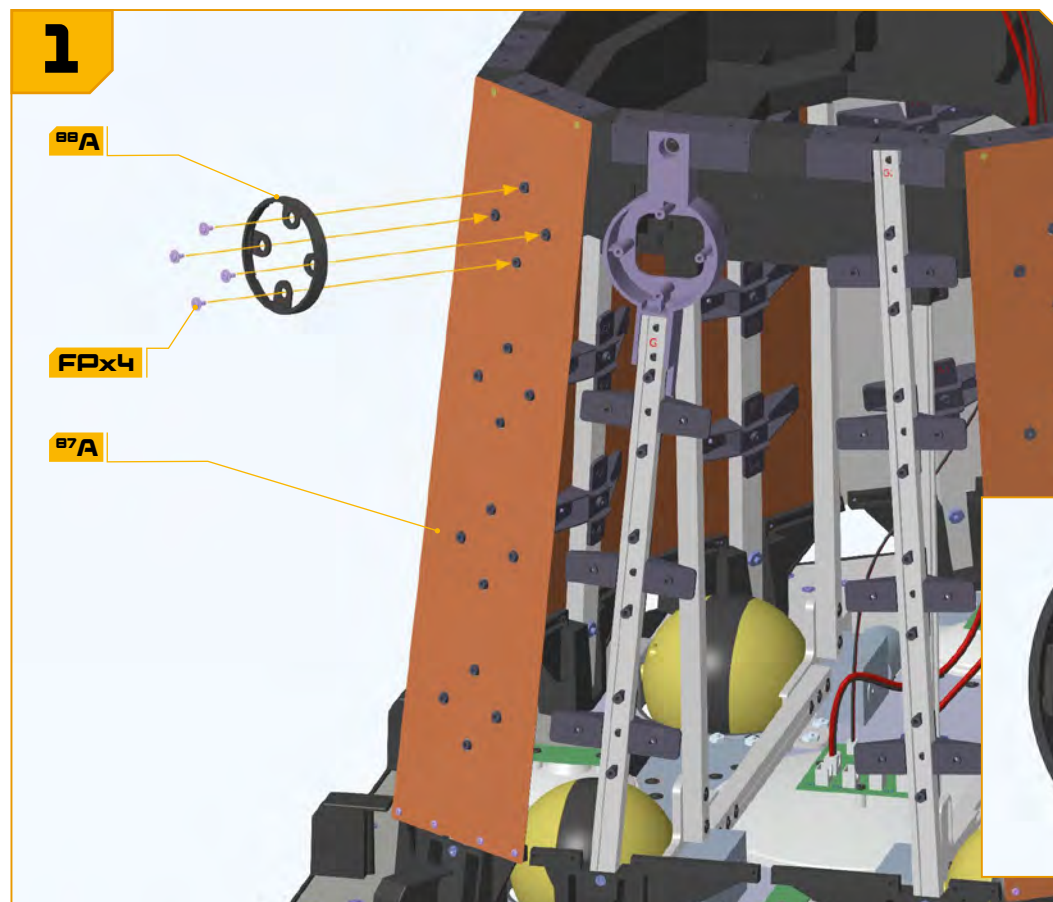

NOTE

The silicone rings are marked on the *inside* (see step 1). They are deeper on one side than the other, and the difference is more marked on the top rings, and gradually changes according to the position on the model.

COMPONENTS OF ISSUE 88			
88A	SILICONE RING (F11-1)	88D	SILICONE RING (F11-4)
88B	SILICONE RING (F11-2)	88E	SILICONE RING (F2 2-1)
88C	SILICONE RING (F11-3)	88F	SILICONE RING (F2 2-2)
		FP	THREE PACKETS OF ELEVEN 2.6 X 4 PWB SCREWS (1 spare)

1

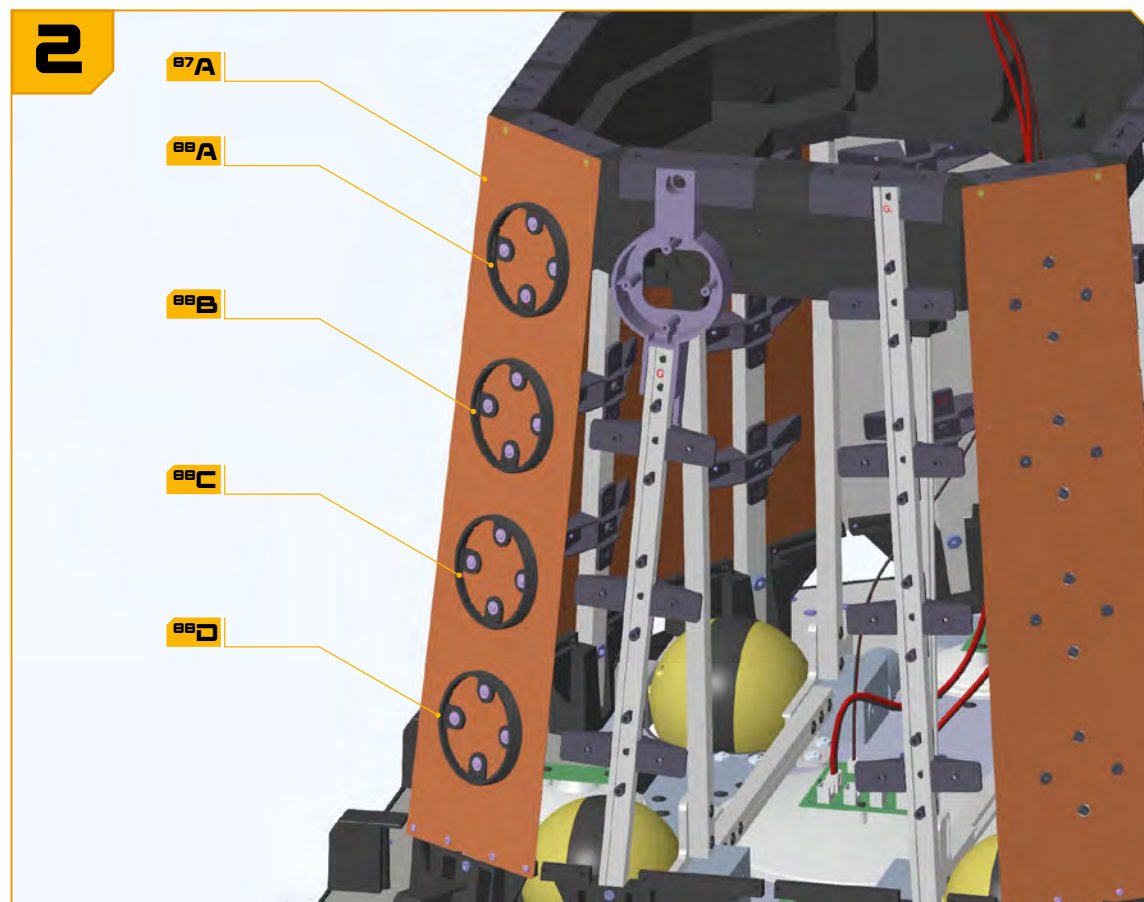

#88-01

Take the ring **88A** (F1-1) and note the orientation: the top of the ring is marked F1 and the bottom is labelled 1-1 (inset). Positioning it with F1 at the top will ensure that the deeper side of the ring is towards the centre of the model. Fit the ring over the raised screw sockets on the top skirt holder, where they come through the panel **87A** (F1). Fix the ring in place with four **FP** screws.

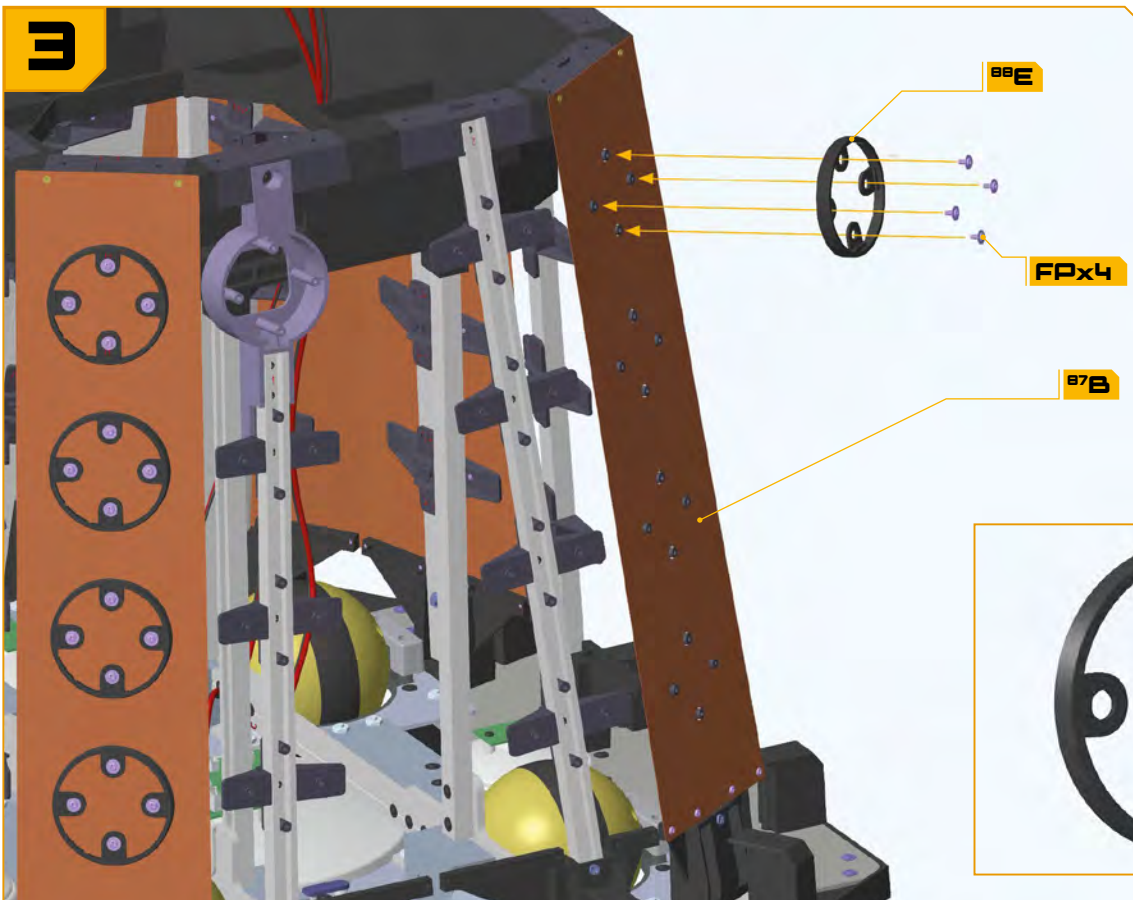

2

#88-02

Similarly fit the silicone rings **88B**, **88C** and **88D** over the remaining sets of raised screw sockets. Again, the label F1 should be at the top. Fix each ring in place with four **FP** screws.

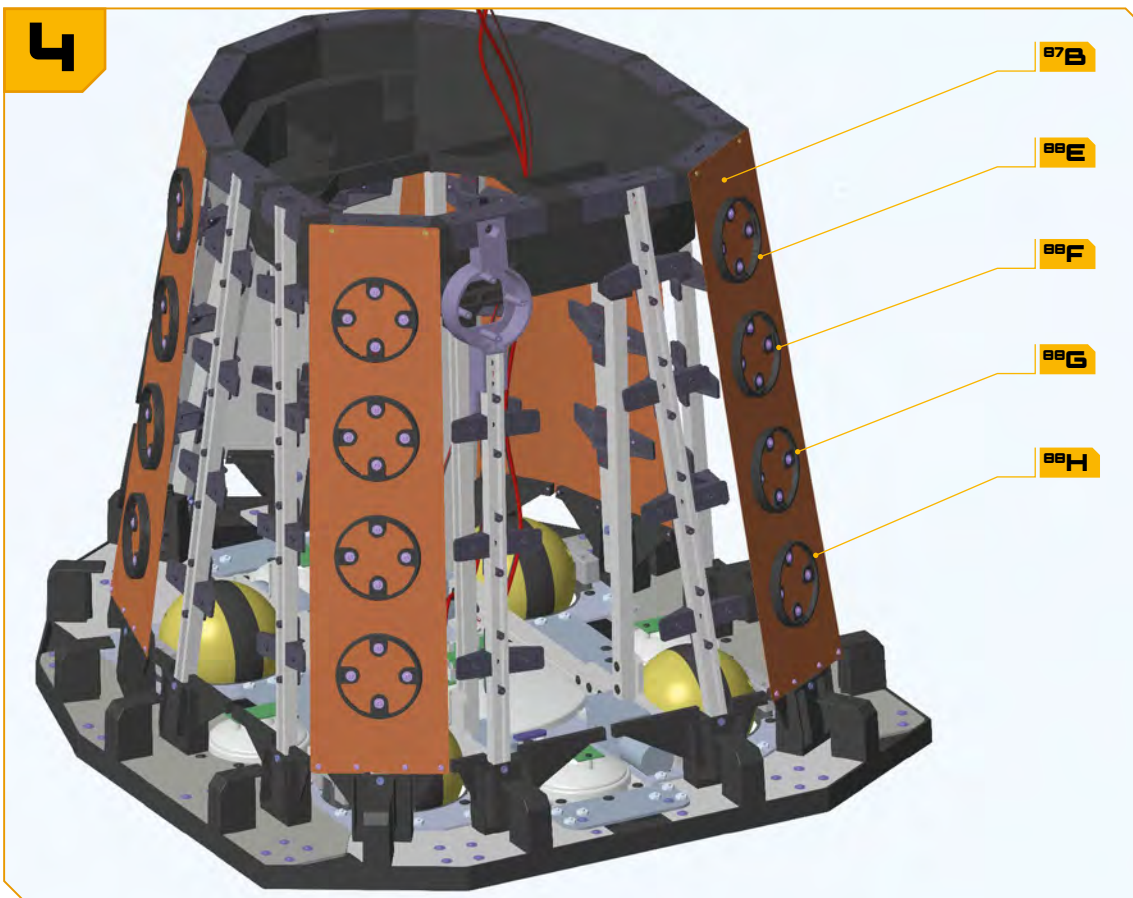

3

#88-03

Similarly, on the other side of the model, fit the ring **88E** (F2-1) over the raised screw sockets on the top skirt holder, where they come through the panel **87B** (F2). Check that you have the ring in the correct orientation, with **F2** at the top (inset). Fix the ring in place with four **FP** screws.

4

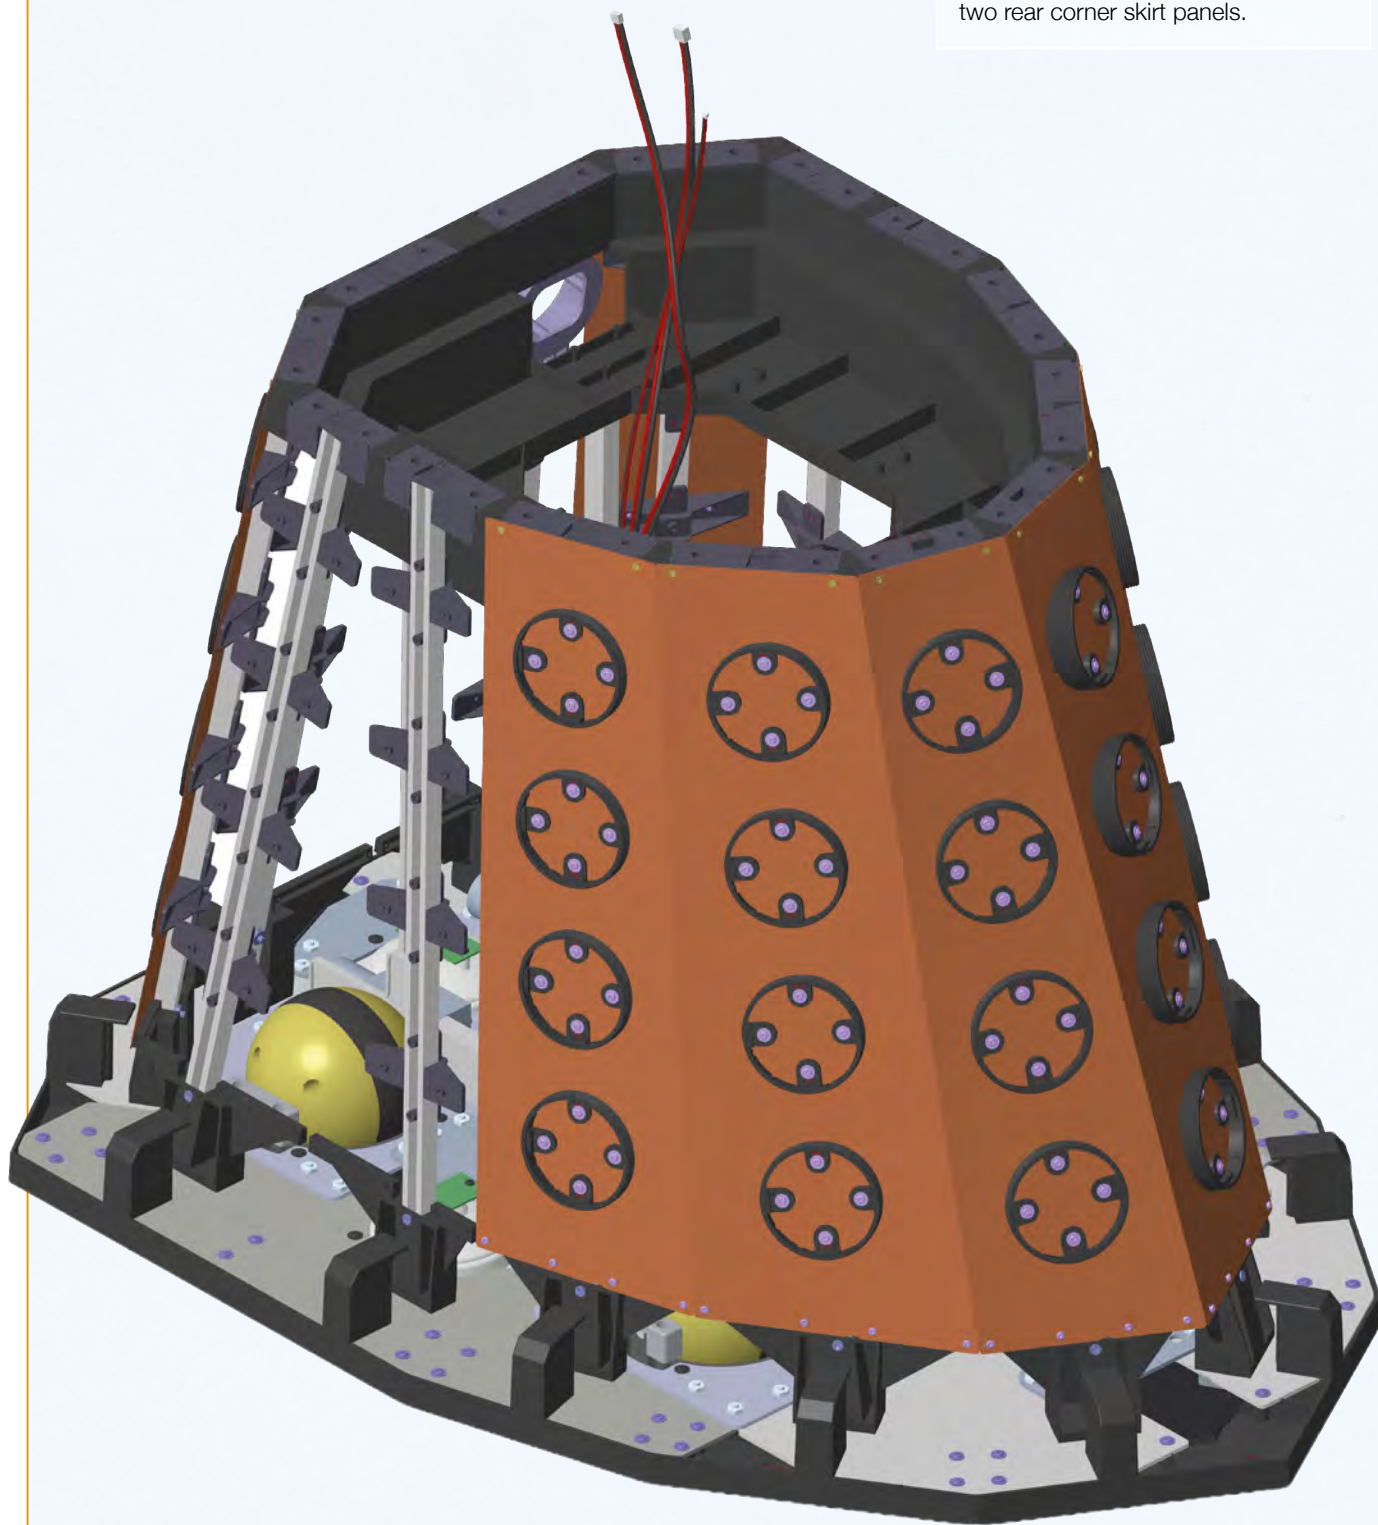

#88-04

Fit rings **88F**, **88G** and **88H** over the remaining three sets of raised screw sockets that come through the panel **87B** (F2), ensuring that the label **F2** is at the top. Fix each ring in place with four **FP** screws.

#088 COMPLETED WORK

Silicone rings have been fitted to two rear corner skirt panels.

THE DALEK

COMING IN
ISSUE 89

✓ BUILD PART 89 ✓

The construction of the lower section of the model continues with the addition of two slightly larger side skirt panels.

THE TIME VORTEX

The Daleks have employed technology in their conquests.

ADVENTURES IN TIME AND SPACE

The Doctor and Rose face an ancient enemy in *I Am a Dalek*.
